Biomagic: Revolutionizing Agriculture through Cutting-Edge Solutions

Presented by Drishti Biotech Pvt Ltd

DRISHTI BIOTECH

Introduction

- In today's rapidly evolving agricultural landscape, sustainable and eco-conscious practices are imperative.
  - Drishti Biotech Pvt Ltd, in collaboration with its esteemed associates, has spearheaded a revolutionary initiative—a consortium of microorganisms designed to empower the farming community.
  - Our mission is to enable organic crop cultivation while liberating farmers from the dependence on chemical fertilizers and pesticides.

Components of Biomagic

- Biomagic incorporates a sophisticated blend of enzymes and microbes, including:
  - Azotobacter
  - Acetobacter
  - Rhizobium
  - Phosphate Solubilizing Bacteria
  - Potash Solubilizing Bacteria
  - Zinc Solubilizing Bacteria
  - Mycorrhizae
  - Trichoderma viride (T.V)
  - Trichoderma harzianum (T.H)
  - Paecilomyces spp
  - Verticillium spp
  - Metarhizium spp
  - Bacillus Thuringiensis
  - Beauveria Bassiana

DRISHTI BIOTECH

Applications of Biomagic

- Enhanced Soil Fertility
- Phosphate Utilization
- Potassium Enhancement
- Zinc Nutrient Solubility
- Symbiotic Relationship
- Biological Sentinel
- Antagonistic Prowess
- Precise Pest Control
- Ecosystem Balance
- Eco-friendly Pest Management
- Residue-free Crop Protection
- Sustainable Pest Control

DRISHTI BIOTECH

Impact on Agriculture, Soil Health, Economy, and Environment

DRISHTI BIOTECH

- Optimizes crop growth, bolster yield, and enhance quality.
- Diminishes reliance on synthetic fertilizers and pesticides.
- Enriches soil fertility and augments nutrient accessibility.
- Increases crop yields and reduces synthetic input costs.
- Reduces chemical fertilizer and pesticide usage.

Commercial Advantage

- Biomagic offers substantial cost benefits to the farming community.
  - While the average cost of acquiring individual components for agricultural enhancement may hover around Rs 6000 to 7500 per acre, Biomagic offers an economic advantage.
  - With an MRP fixed at just Rs 2500 per acre, a 5 Kg jar of Biomagic is designed to treat one acre of land across various crops.

Application Guidelines

- Biomagic application is a straightforward process.
  - It can be applied once during the planting or transplanting season, followed by irrigation or through a drip system.

Conclusion

- Embrace the future of agriculture with Biomagic, where the harmonious synergy of nature and technology paves the way for a sustainable and prosperous agricultural landscape.
  - Each 5 Kg jar of our product, available in powder form, holds the promise of transformation.
  - With an MRP set below Rs 2500 per acre, it bestows farmers with the potential to reap benefits exceeding Rs 15000 to 25000 per acre across various crops.
